DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. The application has been amended as follows: Please cancel claims 16-23.

Election/Restrictions

3. This application is in condition for allowance except for the presence of claims 16-23 directed to an invention non-elected without traverse. Accordingly, claims 16-23 have been cancelled.

Response to Amendment

4. Applicant's amendment and remarks received 15 March 2006 have been entered and overcome the objections cited in the previous office action.

Allowable Subject Matter

5. Claims 1-15 and 24-25 are allowed.
6. The following is an examiner's statement of reasons for allowance: Applicant has amended independent claims 1 and 12 to include a limitation that the spacing glass plate includes a plurality of through holes formed to be aligned with the apertures and argues that the applied reference of Lee (US 6,617,798) does not teach this feature of

Art Unit: 2879

the claimed invention. Applicant's arguments in view of the amendment to the claims are persuasive.

7. Thus, regarding independent claim 1, the prior art of record neither shows or suggests a tetraode field emission display comprising, in addition to other limitations of the claim, a spacing glass extending between an anode plate and a converging electrode plate and having a plurality of through holes formed to be aligned with the apertures. Due to their dependency upon independent claim 1, claims 2-11 and 24 are also allowable.

8. Regarding independent claim 12, the prior art of record neither shows or suggests a tetraode field emission display comprising, in addition to other limitations of the claim, a spacing glass extending between an anode plate and a converging electrode plate and having a plurality of through holes formed to be aligned with the apertures. Due to their dependency upon independent claim 12, claims 13-15 and 25 are also allowable.

9. The subject spacing glass described above is provided for supporting the anode plate and the converging electrode layer, thereby improving the efficiency of the display. The design is new and unique to the art.

10. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
